

# David Bitan

## Senior Product Designer

advance26@gmail.com | 054-9-248-520 | Ashkelon, Israel | Portfolio: david-bitan-portfolio.pages.dev

### PROFESSIONAL SUMMARY

---

Senior Product Designer with 20+ years across fintech, gaming, and AI-first startups. At Ryze Beyond (2019-2026): grew with the company from 32 to 110+ employees and carried product design across every vertical as sole senior designer, using AI-augmented workflows (Claude, ChatGPT, Midjourney, Figma AI) to hold the output of a three-person team. Deep expertise in component-based design systems, WCAG accessibility, user research, prototyping, and end-to-end product design from wireframe to shipped UI. Team contributor on Cactus d'Or, d'Argent and de Bronze wins (French advertising industry) at Publicis Group, 2006-2011.

### PROFESSIONAL EXPERIENCE

---

#### Senior Product Designer (UI / UX / AI) - Ryze Beyond (formerly TrafficPoint)

2019 - 2026

- Architected advanced, reusable Figma component systems — variants, auto layout, nested and interactive components — used across every product vertical
- Led user research, usability testing, A/B testing, persona development, and journey mapping to ground design decisions in real user behavior
- Built and maintained multiple design systems and component libraries, including custom icon sets, across the brand's several product verticals, with WCAG accessibility compliance built in
- Grew with the company from 32 to over 110 employees, driving product design across all platforms while the design team grew from 2 to 3 designers, whom I trained and mentored directly
- Sustained the delivery output of the full three-person design team, and the design function was consolidated around a single senior designer
- Used AI extensively over the last two years: Claude and ChatGPT to accelerate concepting and iteration, and Midjourney, Leonardo AI, and Figma's AI features (First Draft, image generation, Make, and Sites) to generate visual assets and layouts directly, in step with the company's broader shift toward a leaner, AI-driven team structure
- Pioneered new product concepts (Sonary Software Stack Manager dashboards, AI recommendation flows, chatbot UX) contributing to significant revenue growth

#### Senior UI/UX Designer - Smart.bid (LoanMax Team)

2018 - 2019

- Led UI/UX design for the LoanMax brand and all its sub-brands across all platforms
- Created high-impact visual design materials and design solutions
- Rebranded the website, mobile web, and payment application
- Built a financial portal from scratch, including wireframes, UX, and UI design
- Produced design materials for landing pages, blogs, websites, and social media

#### UI/UX Designer - Wochat (instant-translation messaging app)

2017 - 2018

- Delivered all design aspects, including sketches, user flows, wireframes, and specifications, for the Wochat mobile app
- Researched new ideas and features, and owned Wochat's branding
- Specified and designed mobile and desktop sites, and built pages in HTML5 / CSS3
- Designed landing pages, banners, and animations
- Wrote video scenarios and handled compositing

#### UI/UX Designer - Gamingtech (Sports & Casino Gaming Company)

2015 - 2017

- Developed sketches, wireframes, and designs for mobile and web
- Designed landing pages and applications
- Handled branding, specification, and design for mobile and websites for the brands 10Bet, Real Deal Bet, and Bet Rally
- Designed banners and interactive calendars, including animated interactive banners in HTML5 / CSS3
